All proceeds benefit the Southeastern Brain Tumor Foundation. Since inception in 1995, the SBTF has awarded almost \$3,000,000 in research grants, more than \$100,000 in educational scholarships, hosted thousands of support groups and offered resources to the brain tumor community.

This year 88,970 Americans will receive a primary brain tumor diagnosis and join over 700,000 living with a primary brain tumor. Patients with a malignant brain tumor face a 36% relative survival rate. In addition, approximately 80% of cancers have been associated with the ability to metastasize to the brain.

Despite the number of brain tumors, and their devastating prognosis, there are only five FDA approved drugs, and one device, to treat brain tumors. The SBTF's mission is to change that fact while offering support.
